01 · EFFECTIVE SEPT 2026

Your PF Just Went Up. We're Covering Our Side of It.

The government raised the PF wage ceiling from **₹15,000 to ₹25,000**, effective Sept 2026. That means more money goes into your PF every month, yours and ours.

Normally the employer's share of that increase would come out of your CTC. **We decided it shouldn't.**

ContentNinja is absorbing that extra cost by bumping up your CTC, so your gross salary stays exactly the same. Your take-home dips a little since your own PF share goes up too, but that's just extra money heading straight into your retirement, nowhere else.

Full breakup in Keka.

The Get Shit Done (GSD) Award Is Finally Here 🏆

Some people talk about getting things done. Others just do it. No drama, no chasing, no "circling back" they deliver, quietly and consistently. This quarter, we're putting a number on that: 💸₹10,000, and bragging rights that'll outlast the year-end slide deck.

We all get two votes — spend them wisely. Nominate the two people who made your work (or your week) easier just by doing theirs well. Nominations close by 23 Dec 2026.

Vote Here

One rule: self-nominations don't count. We already know you think you're the GOAT, let's see what everyone else thinks 👀

03 NEW

Learning & Development Is Now a Real Budget Line

We're putting real money behind learning and upskilling now — courses, certifications, tools, conferences or whatever helps you grow.

[Some suggestions of courses and certifications the team can do, referred by their managers]

Statwide

Launched A New Product Analytics Platform: Statwide

Statwide helps SaaS, B2B and B2C businesses understand how users interact with their websites and apps, track their journeys, and identify where they face friction or drop off. It transforms user behaviour into actionable insights, empowering product teams to make data-driven decisions, improve user experiences, and drive engagement, retention, and growth.

A LITTLE ABOUT ME (SIDDHANT)

Hi, I'm Siddhant, GTM Lead at Statwide. My role involves driving go-to-market initiatives, building relationships with potential customers, and introducing businesses to how Statwide can help them better understand user behaviour through website and product analytics.
